

● **OpenAsset upgrade**

Axomic has launched version 2.1 of its browser-based image library, software OpenAsset. The software has been designed to manage libraries of digital images (*Business & IT* May 21) through a web-browser interface; images can be collected in a variety of resolutions and

formats for a wide range of applications. The new version includes features such as Batch Upload, Batch Update and a Saved Albums facility. Practices using OpenAsset include Feilden Clegg Bradley , Wilkinson Eyre and Assael Architecture. Further information at www.axomic.com
